

Frontend Engineer Angular

We are currently seeking a highly motivated and talented Frontend Engineer. As a Frontend Engineer at Loft Dynamics, you will have the opportunity to shape the technical direction of our products. You will be a crucial team member responsible for designing robust architecture, writing clean and reliable Angular code, and maintaining code quality. Suppose you are a proactive individual who enjoys being part of a collaborative team and can take on broader personnel responsibilities as the company grows. In that case, we want to hear from you!

YOUR ROLE AND RESPONSIBILITIES:

- Design robust architecture
- Write clean, reliable, and high-performance Angular code.
- Develop, test, and design high-quality software systems.
- Maintain code quality and adhere to best practices.
- Collaborate with cross-functional teams to co-develop and enhance existing products.
- Implement technical requirements for various frontends.

YOUR BACKGROUND AND SKILLS:

- At least a BSc in software engineering or a relevant engineering field;
- 3+ years' experience in software development with Angular;
- Proficiency in writing clean CSS/SCSS;
- Good communication skills in German (min. B2 level) and English;
- Work permit for Switzerland;
- Excellent problem-solving and debugging skills.

A PLUS WOULD BE:

- Experience with CI/CD technologies

ABOUT US

Loft Dynamics is a team of over 50 passionate hard- and software engineers, highly specialized developers, and dedicated aviation and production experts that has achieved the world's first qualification for a Virtual Reality Motion training device by the European Aviation Safety Authority EASA with its Robinson R22 & Airbus H125 training solutions. All mechanical designs and electronic systems are engineered and coordinated in-house. Another strength of the team is its proximity to flight schools and professional operators worldwide. Swiss launching customer Mountainflyers, the Heli Academy, the development partner Air Zermatt, the helicopter manufacturer Airbus Helicopters and other important industrial partners enable the development of highly performing and innovative training solutions with the best possible value. Several European and North American training centers have already ordered our training devices and services and operate them successfully. The company is multiplying its products and services offers and growing rapidly.

We offer a modern and flexible working environment with the latest development tools, exciting challenges, and future-oriented career opportunities for you! If you are interested, we would enjoy receiving your application documents. We are looking forward to getting to know you.
